Manuscript Preparation, Mailing and Processing

Preparation

Research articles (in general not exceeding 10 printed pages), reviews (up to 30 printed pages) and notes (1 to 3 printed pages) must be typewritten with double spacing. 'Marine Ecology – Progress Series' invites interpretative rather than descriptive contributions. Reviews should be critical, instructive evaluations of the state-of-the-art – not mere compilations of information.

Abstracts All contributions must be preceded by a brief, concise abstract. In the shortest possible way, the abstract should outline the scope of the paper and highlight its main results and conclusions.

Figures must be very carefully prepared, numbered and accompanied by brief, precise legends. For examples consult recent issues. Mark desired position of figures in the manuscript margin.

Tables should not be excessive in size. They must be numbered and be headed by brief, compendious legends. Mark desired position of tables in the manuscript margin. Unusual symbols used must be explained.

Genus and species names: underline for *italics*. Genus names should appear in full the first time mentioned in a given paragraph.

Citation of literature All literature quoted in the text must be listed, in alphabetical order of author names, at the end of the manuscript. Please abbreviate publications according to 'World List of Scientific Periodicals', latest edition, London. For examples of literature citation see below.

Mailing

Address manuscripts (original plus 2 copies) to the editor or to an advisor. For safety use registered mail.

Processing

Manuscripts are critically evaluated by at least 3 reviewers. The editor then decides on acceptance or rejection. Acceptable manuscripts are usually returned to the author requesting consideration of comments and criticism. Present rejection rates range from 35 to 50 % for manuscripts from different parts of the world.

When an accepted manuscript is ready for publication, the author will be notified and the date of manuscript acceptance fixed. This date appears at the end of each printed contribution. Average time between acceptance and publication is 3 mo.

The author receives 2 sets of proofs directly from the printer. Printing errors must be carefully corrected. At this stage, stylistic changes are not acceptable without compensatory payment. Please return 1 set of proofs by air mail.

Offprints: Forty offprints (reprints) of each contribution will be made available free of charge. Additional offprints can be purchased. For offprint prices consult the form accompanying the proofs. Orders for additional offprints must be made when returning the proof (use the form provided).

'Marine Ecology – Progress Series' levies no page charge.
The last issue of each set of 10 volumes features a combined author/title index.

---

Marine Ecology – Progress Series is edited in cooperation with the Advisors listed below and about 300 anonymous Referees. The Advisors' addresses and fields of expertise are detailed at the end of the last (3rd) issue of each volume, together with the volume contents. Advisors participate actively in shaping the journal's standard, format and future. They critically evaluate the scientific merits of manuscripts submitted for publication; suggest topics and authors for reviews; select and present suitable high-quality manuscripts; and bring to the editor's attention important new developments in the field of marine ecology.

Inter-Research 1986

Advisors

Advisors to 'Marine Ecology – Progress Series' are appointed for a four-year period. They are expected to:

- ○ critically evaluate the scientific merits of manuscripts submitted for publication
- ○ suggest topics and authors for reviews
- ○ select and present suitable high-quality manuscripts
- ○ draw attention to new facts, concepts and methods

In addition to the advisors listed below, about 300 referees cooperate anonymously.

ENVIRONMENTAL FACTORS

Alderdice, D., Dr.
Pacific Biological Station, Nanaimo, B.C. V9R 5K6, Canada
Responses to environmental stress

Dring, M. J., Dr.
Botany Dept, The Queen's Univ. of Belfast, Belfast BT7 1NN, Northern Ireland
Physiological ecology of algae

Fisher, N. S., Dr.
Dept of Oceanography, Brookhaven National Laboratory, Upton, Long Island, NY 11973, USA
Physiological ecology of phytoplankton

Fowler, S. W., Dr.
International Laboratory of Marine Radioactivity, Musée Océanographique, MC 98000 Monaco
Environmental effects on invertebrates

Gunkel, W., Dr.
Biologische Anstalt Helgoland, D-2192 Helgoland, Federal Republic of Germany
Environmental effects on bacterial growth

Haedrich, R. L., Prof.
Memorial University of Newfoundland, St. John's, Nfld. A1B 3X9, Canada
Environmental effects on fishes

Lawrence, J., Prof.
Dept of Biology, Univ. of South Florida, Tampa, FL 33620, USA
Physiological ecology of invertebrates

MacLeod, R. A., Prof.
Dept of Microbiology, Faculty of Agriculture, MacDonald College, 21, 111 Lakehore Road, Ste. Anne de Bellevue, P.Q. H9X 1C0, Canada
Physiological ecology of microorganisms

Meyers, S. P., Prof.
Dept of Food Science, Louisiana State Univ., Baton Rouge, LA 70803, USA
Physiological ecology of microorganisms

Morita, R. Y., Prof.
Dept of Microbiology, Oregon State Univ., Corvallis, OR 97331, USA
Environmental effects on microorganisms

Newell, R. C., Prof.
Institute for Marine Environmental Research, Prospect Place, The Hoe, Plymouth PL1 3DH, England
Environmental relations of intertidal animals

Paasche, E., Prof.
Dept of Biology, Univ. Oslo, Marine Botany, P.O.B. 1069, Blindern, N-0316 Oslo 3, Norway
Physiological ecology of phytoplankton

Reed, R. H., Dr.
The University of Dundee, Dept of Biological Sciences, Dundee DD1 3HN, Scotland
Physiological ecology of algae and cyanobacteria

Rheinheimer, G., Prof.
Institut für Meereskunde, Univ. Kiel, Düsternbrooker Weg 20, D-2300 Kiel, Federal Republic of Germany
Environmental effects on microorganisms

Riisgård, H. U., Dr.
Odense Universitet, Biologisk Institut, Campusvej 55, DK-5230 Odense M., Denmark
Environmental effects on invertebrates

Sammarco, P. W., Dr.
Australian Institute of Marine Science, P M B No. 3, Townsville M.C., Q. 4810, Australia
Experimental ecology; chemical ecology

Scheltema, R. S., Dr.
Woods Hole Oceanographic Institution, Woods Hole, MA 02543, USA
Reproduction of benthic invertebrates

Segal, E., Prof.
Dept of Biology, California State Univ., Northridge, CA 91330, USA
Physiological ecology of invertebrates

Sidell, B. D., Prof.
Dept of Zoology, Univ. of Maine at Orono, Murray Hall, Orono, ME 04469, USA
Physiological ecology of fishes

Southward, A. J., Dr.
Mar. Biol. Ass. U.K, The Laboratory, Citadel Hill, Plymouth PL1 2PB, England
Environmental effects on invertebrates

Syrett, P. J., Prof.
Dept of Botany and Microbiology, University College of Swansea, Singleton Park, Swansea SA2 8PP, Wales, UK
Physiological ecology of phytoplankton

Vernberg, J., Prof.
Belle W. Baruch Institute for Marine Biol. and Coastal Res., Univ. of South Carolina, Columbia, SC 29208, USA
Physiological ecology of invertebrates

Winter, J. E., Dr.
Instituto de Zoología, Univ. Austral de Chile, Casilla 567, Valdivia, Chile
Physiological ecology of invertebrates

Woodhead, D. S., Dr.
Ministry of Agriculture, Fisheries and Food, Fisheries Radiobiological Lab., Hamilton Dock, Lowestoft, Suffolk NR32 1DA, England
Effects of radioactivity

ZoBell, C. E., Prof.
Scripps Institution of Oceanography, Univ. Calif., San Diego, P.O.B. 1529, La Jolla, CA 92093, USA
Environmental effects on microorganisms

PHYSIOLOGICAL MECHANISMS

Bayne, B. L., Dr.
Institute for Marine Environmental Research, Prospect Place, The Hoe, Plymouth PL1 3DH, England
Comparative physiology

Beardmore, J. A., Prof.
Univ. College of Swansea, Dept of Genetics, Singleton Park, Swansea SA2 8PP, Wales, UK
Adaptation; selection

Bonotto, S., Prof.
Centre d' Etude de l'Energie Nucléaire, Lab. du C.E.N./S.C.K., B-2400 Mol, Belgium
Cellular biology and sexuality

Bulnheim, H.-P., Prof.
Biologische Anstalt Helgoland, Notkestr. 31, D-2000 Hamburg 52, Federal Republic of Germany
Metabolic performance of invertebrates; reproductive biology and sexuality

Costlow, J. D., Jr., Prof.
Duke University Marine Laboratory, Pivers Island, Beaufort, NC 28516, USA
Developmental physiology; endocrinology

Enright, J. T., Prof.
Scripps Institution of Oceanography, San Diego, P.O.B. 1529, La Jolla, CA 92093, USA
Biological rhythms

Forward, R. B., Jr., Dr.
Duke University Marine Laboratory Pivers Island, Beaufort, NC 28516–9721, USA
Environmental zoo-physiology; behavior; biological rhythms

Gerking, S. D., Prof.
Dept of Zoology, Arizona State Univ.,Tempe, AZ 85281, USA
Fish physiology

Holland, N. D., Prof.
Scripps Institution of Oceanography, San Diego, P.O.B. 1529, La Jolla, CA 92093, USA
Comparative, cellular and developmental physiology

Humphrey, G. F., Dr.
CSIRO Marine Biochemistry, Building A12, Sydney Univ., N.S.W. 2006, Australia
Photosynthesis; plankton biochemistry

Levandowsky, M., Dr.
Haskins Laboratories at Pace Univ., 41 Park Row, New York, NY 10038, USA
Chemosensory mechanisms

Naylor, E., Prof.
School of Animal Biology, Univ. Coll. North Wales, Bangor, L57 2UW, Wales, UK
Behavioural physiology

Puiseux-Dao, S., Prof.
Laboratoire de Cytophysiologia végétale et de Toxicologie cellulaire, Université de Paris VII, 2, Place Jussieu, F-75251 Paris Cedex 05, France
Ecophysiology and toxicology of algae

Siebers, D., Dr.
Biologische Anstalt Helgoland, Notkestr. 31, D-2000 Hamburg 52, Federal Republic of Germany
Comparative biochemistry and physiological ecology of invertebrates

Zhirmunsky, A. V., Prof.
Institute of Marine Biology, Academy of Sciences, Vladivostok 690022, USSR
Mechanisms of cellular resistance and control

CULTIVATION

Bardach, J. E., Prof.
Dept of Geography, Univ. Hawaii at Manoa, 2424 Maile Way, Honolulu, HI 96822, USA
General aspects of cultivation; aquaculture

Bonotto, S., Prof.
Centre d'Étude de l'Énergie Nucleaire, Lab. du C.E.N./S.C.K., B-2400 Mol, Belgium
Cultivation of multicellular algae including aquaculture

Lawrence, J., Prof.
Dept of Biology, Univ. of South Florida, Tampa, FL 33620, USA
Nutrition of invertebrates

Levandowsky, M., Dr.
Haskins Laboratories at Pace Univ., 41 Park Row, New York, NY 10038, USA
Microcosm cultures

Magne, F., Prof.
Univ. de Paris VI, Inst. de Biologie Végétale, UER 59, 7, Quai Saint-Bernard, F-75230 Paris, Cedex 05, France
Cultivation of algae, excluding aquaculture

Meyers, S. P., Prof.
Dept of Food Science, Louisiana State Univ., Baton Rouge, LA 70803, USA
Cultivation of microorganisms and crustaceans; aquaculture

Paffenhöfer, G.-A., Prof.
Skidaway Institute of Oceanography, Univ. System of Georgia, P.O.B. 13687, Savannah, GA 31416, USA
Cultivation of zooplankton

Pandian, T. J., Prof.
School of Biological Sciences, Madurai Kamaraj Univ., Madurai 625 021, Tamilnadu, India
Cultivation of decapods and fishes; Bioenergetics

Rheinheimer, G., Prof.
Institut für Meereskunde, Univ. Kiel, Düsternbrooker Weg 20, D-2300 Kiel, Federal Republic of Germany
Cultivation of microorganisms

Rosenthal, H., Dr.
Biologische Anstalt Helgoland, Notkestr. 31, D-2000 Hamburg 52, Federal Republic of Germany
Cultivation of and environmental effects on fishes

Ryther, J. H., Dr.
Center for Marine Biotechnology, Harbor Branch Institution, RR 1, Box 196 A, Ft. Pierce, FL 33450, USA
Cultivation of aquatic plants

Tseng, C. K., Prof.
Institute of Oceanology, Academia Sinica, 7 Nan-Hai Road, Qingdao, People's Republic of China
Aquaculture of seaweeds

Ukeles, R., Dr.
U.S. Dept of Commerce, NOAA, National Marine Fisheries Service, Northeast Fisheries Center, Milford Lab., 212 Rogers Ave, Milford, CT 06460-6499, USA
Cultivation of unicellular algae

Westernhagen, H. von, Dr.
Biologische Anstalt Helgoland, Notkestr. 31, D-2000 Hamburg 52, Federal Republic of Germany
Cultivation of crustaceans and fishes

Wildish, D. J., Dr.
Fisheries and Environmental Sciences, Biological Station, St. Andrews, N. B., EOG 2X0, Canada
Bivalve aquaculture

Winter, J. E., Dr.
Instituto de Zoología, Univ. Austral de Chile, Casilla 567, Valdivia, Chile
Cultivation of invertebrates

ZoBell, C. E., Prof.
Scripps Institution of Oceanography, Univ. Calif., San Diego, P.O.B. 1529, La Jolla, CA 92093 USA
Cultivation of microorganisms

DYNAMICS

Arndt, E. A., Prof.
Wilhelm-Pieck-Universität Rostock, Sektion Biologie, Freiligrathstr. 7/8, DDR-2500 Rostock, German Democratic Republic
Ecological dynamics of brackish waters

Bak, R. P. M., Dr.
Nederlands Instituut voor Onderzoek der Zee, Postbox 59, 1790 Den Burg – Texel, The Netherlands
Coral-reef ecology

Banse, K., Prof.
Dept of Oceanography, Univ. Washington, Seattle, WA 98195, USA
Biological oceanography; plankton research

Berman, T., Prof.
Israel Oceanographic & Limnological Research Ltd., Tel Shikmona, P.O.B. 8030, Haifa 31080, Israel
Phytoplankton ecology

Bianchi, A., Dr.
C.N.R.S., Microbiologie Marine, Université de Provence, 3, Place Victor Hugo, F-13331 Marseille Cedex 3, France
Marine microbiology

Birkeland, C., Prof.
Univ. of Guam, Marine Laboratory, UOG Station, Mangilao, GUAM 96913
Coral-reef ecology

Bonner, W. N., Mr.
British Antarctic Survey, High Cross Madingley Rd, Cambridge CB3 OET, England
Polar ecology

Bravo de Laguna, J., Dr.
Instituto Español de Oceanografia, Alcalá, 27–4^0, E-28014 Madrid, Spain
Fishery biology; stock assessment

Bunt, J. S., Dr.
Australian Institute of Marine Science, P.O.B. 422, Malanda, Q. 4885, Australia
Mangrove systems; reef studies

Conover, R. J., Dr.
Marine Ecology Laboratory, Bedford Institute of Oceanography, P.O.B. 1006, Dartmouth, N.S. B2Y 4A2, Canada
Zooplankton biology

Cushing, D. H., Dr.
Ministry of Agriculture, Fisheries and Food, Fisheries Laboratory, Lowestoft, Suffolk NR33 OHT, England
Productivity of the sea; fish-population dynamics

Fenchel, T., Prof.
Institute of Ecology and Genetics, Univ. of Aarhus, Ny Munkegade, Building 550, DK-8000 Aarhus C, Denmark
Population biology; microbial ecology

Field, J. G., Prof.
University of Cape Town, Zool. Dept, Rondebosch 7700, Republic of South Africa
Dynamics of nearshore ecosystems

Floc'h, J. Y., Dr.
Lab. de Physiologie Végétale, Faculté des Sciences, Ave Victor le Gorgeau, F-29283 Brest Cedex, France
Nutrition of macroalgae

Gage, J. D., Dr.
Dunstaffnage Marine Research Laboratory, P.O.B. 3, Oban, PA34 4AD, Scotland
Benthos of deep sea and temperate coasts

Gerlach, S. A., Prof.

MARINE ECOLOGY – PROGRESS SERIES

HISTORY: 'Marine Ecology – Progress Series' (MEPS) was established in response to requests from numerous marine ecologists from all over the world. The series is based on 'Marine Ecology' – the first comprehensive, integrated treatise on life in oceans and coastal waters – conceived, organized and edited by Professor Otto Kinne, and published by John Wiley & Sons.

AIM: 'Marine Ecology – Progress Series' serves as a world-wide forum for all aspects of marine ecology, fundamental and applied. The journal covers microbiology, botany, zoology, ecosystem research, biological oceanography, fisheries, aquaculture, pollution, environmental protection, conservation and resource management.
Ecological research has become of paramount importance for man's future. The information presented here should, therefore, encourage critical application of ecological knowledge for the benefit of mankind and, in fact, of life on earth. 'Marine Ecology – Progress Series' strives for

- ◯ complete coverage of the field of marine ecology
- ◯ the highest possible quality of papers
- ◯ quick publication
- ◯ a high technical standard of presentation.

Editor and publisher attempt to achieve these goals in close cooperation with advisors, referees, contributors and readers. Criticism and advice are cordially invited (please address to the editor).

SCOPE: 'Marine Ecology – Progress Series' is international and interdisciplinary. Presenting research articles, reviews and notes, it has been created for prompt publication of contributions concerned with:

Environmental Factors: Tolerances and responses of marine organisms (microorganisms, autotrophic plants, and animals) to variations in abiotic and biotic components of their environment; radioecology.

Physiological Mechanisms: Synthesis and transversion of organic material (mechanisms of auto- and heterotrophy); thermo-, ion-, osmo- and volume-regulation; stress resistance; non-genetic and genetic adaptation; population genetics; orientation in space and time; migrations; behaviour.

Cultivation: Maintenance and rearing of, as well as experimentation with, marine organisms under environmental and nutritional conditions which are, to a considerable degree, controlled; analysis of the physiological and ecological potential of individuals, populations and species; determination of nutritional requirements; ecological aspects of aquaculture; water-quality management; culture technology.

Dynamics: Production, transformation, and decomposition of organic matter in marine ecosystems; food webs; trophic interrelations; population dynamics; plankton ecology; benthos ecology; estuarine and coastal ecology; wadden-sea ecology; coral-reef ecology; deep-sea ecology; open-ocean ecology; polar ecology; theoretical ecology; ecological modelling.

Ocean Management: Applied marine field ecology; inventory, protection and management of living resources in coastal areas, estuaries and open oceans; ecological aspects of fisheries; pollution of marine areas and organisms; protection of life in the seas; management of populations, species and ecosystems; management of coastal zones and sea areas.

Subscription Information

1986: 8 volumes (27–34), 3 issues per volume
Subscribers in North America: US $ 147 per volume.
Annual rate for 8 volumes: US $ 1176 including postage, handling and insurance.

Subscribers in all other countries: DM 276 per volume.
Annual rate for 8 volumes: DM 2208 plus postage, handling and insurance.

1987: 7 volumes (35–41), 3 issues per volume
Subscribers in North America: US $ 157 per volume.
Annual rate for 7 volumes: US $ 1099 including postage, handling and insurance.

Subscribers in all other countries: DM 286 per volume.
Annual rate for 7 volumes: DM 2002 plus postage, handling and insurance.

Special Conditions (for personal use of individual scientists only)
(1) Advisors: free copies.
(2) Staff referees: DM 48 per volume, providing their institutional library subscribes to the journal.
(3) All other scientists: DM 85 per volume, providing their institutional library subscribes to the journal.
(4) Students: DM 75 per volume, providing their university library subscribes to the journal.

Subscriptions are entered with annual prepayment only. They should be addressed to Inter-Research, P.O.B. 1120, D-2124 Amelinghausen, F.R.G.

Missing issues must be claimed within 4 months after publication.

Publisher: Inter-Research, P.O.Box 1120, D-2124 Amelinghausen, Federal Republic of Germany.

Manuscript Preparation, Mailing and Processing

Preparation

Research articles (in general not exceeding 10 printed pages), reviews (up to 30 printed pages) and notes (1 to 3 printed pages) must be typewritten with double spacing. 'Marine Ecology – Progress Series' invites interpretative rather than descriptive contributions. Reviews should be critical, instructive evaluations of the state-of-the-art – not mere compilations of information.

Abstracts All contributions must be preceded by a brief, concise abstract. In the shortest possible way, the abstract should outline the scope of the paper and highlight its main results and conclusions.

Figures must be very carefully prepared, numbered and accompanied by brief, precise legends. For examples consult recent issues. Mark desired position of figures in the manuscript margin.

Tables should not be excessive in size. They must be numbered and be headed by brief, compendious legends. Mark desired position of tables in the manuscript margin. Unusual symbols used must be explained.

Genus and species names: underline for *italics*. Genus names should appear in full the first time mentioned in a given paragraph.

Citation of literature All literature quoted in the text must be listed, in alphabetical order of author names, at the end of the manuscript. Please abbreviate publications according to 'World List of Scientific Periodicals', latest edition, London. For examples of literature citation see below.

Mailing

Address manuscripts (original plus 2 copies) to the editor or to an advisor. For safety use registered mail.

Processing

Manuscripts are critically evaluated by at least 3 reviewers. The editor then decides on acceptance or rejection. Acceptable manuscripts are usually returned to the author requesting consideration of comments and criticism. Present rejection rates range from 35 to 50 % for manuscripts from different parts of the world.

When an accepted manuscript is ready for publication, the author will be notified and the date of manuscript acceptance fixed. This date appears at the end of each printed contribution. Average time between acceptance and publication is 3 mo.

The author receives 2 sets of proofs directly from the printer. Printing errors must be carefully corrected. At this stage, stylistic changes are not acceptable without compensatory payment. Please return 1 set of proofs by air mail.

Offprints: Forty offprints (reprints) of each contribution will be made available free of charge. Additional offprints can be purchased. For offprint prices consult the form accompanying the proofs. Orders for additional offprints must be made when returning the proof (use the form provided).

'Marine Ecology – Progress Series' levies no page charge.
The last issue of each set of 10 volumes features a combined author/title index.
